

College Resource Hub Website

1. Project Overview

- **Objective:** Build a centralized platform for academic resources, announcements, and interactive support.
- **Purpose:** Provide easy access to study materials, streamline communication, and support students with an AI-powered chatbot.
- **Expected Outcome:** A responsive, user-friendly portal with resource management and intelligent assistance.

2. Project Scope

- **Core Features:**
 - Student & faculty login system
 - Repository for study materials (PDFs, notes, assignments)
 - Admin privileges: Add, update, and delete study materials
 - Announcements & event updates
 - Discussion forums / Q&A section
 - Chatbot integration: AI-driven assistant for FAQs, guidance, and resource navigation
 - Admin dashboard for content and chatbot management

3. Technical Stack

- **Frontend:** HTML5, CSS3 (animated & responsive), JavaScript, Bootstrap
- **Backend:** javascript
- **Database:** mongo db
- **Hosting:** netlify
- **Version Control:** GitHub
- **Chatbot:** NLP-based chatbot

4. Success Metrics

- **Number of active users (students/faculty)**
- **Frequency of study material uploads/deletions by admin**
- **Chatbot usage statistics (queries answered, satisfaction rate)**
- **Reduction in communication gaps**
